

Since 2002, the software Hawai'i organizations rely on.

Tapiki is a senior technology practice in Hawai'i. We design, build, and maintain the platforms, applications, and web presence that health systems, financial institutions, schools, government agencies, and established businesses depend on.

Core competencies

Technology Partnership

Senior technology leadership on retainer: strategy, vendor evaluation, architecture, security posture, board-level reporting, and hands-on engineering when it counts.

Platforms & Applications

Custom platforms, iPhone and Android apps, and AI-integrated systems from architecture through production, including on-device machine learning.

Web & Digital Presence

Public websites for institutions, audited against WCAG 2.2 AA and kept secure and current long after launch.

Differentiators

- Technical leadership from Brian Dote: former UI Engineering Manager for Apple's .Mac and iCloud (five US patents), former Senior Vice President of Mobile & Digital Commerce at Bank of Hawaii, and first Chief Innovation Officer at Mid-Pacific Institute.
- Currently CTO of Mission Management Company; Chief Engineer at iFirst Medical Technologies until 2025.
- A practice led by Brian Dote with a stable bench of partners: design from IQ 360 and other Hawai'i agencies, development from TechRiver and other US-based partners of nearly 20 years.
- WCAG 2.2 AA as the baseline for every build. Experience working under HIPAA.
- Clients own the code and the accounts from day one, on standard, documented stacks.

Past performance

Financial services	Central Pacific Bank · Charles Schwab · Hawaii Central FCU · Bank of Hawaii (boh.com, co-led)
Healthcare	Hawai'i Pacific Health · Kuakini Health System
Education	Kamehameha Schools · Harvard Graduate School of Education · Mid-Pacific Institute
